

GOO- MOREMI GORGE

Moremi Gorge, situated deep within the hills, accessible on foot through a steep climb, is the source of three permanent waterfalls. The first two are smaller but fan out into large waterholes. The uppermost falls are ten-metres high, cascading over rocky outcrops and collecting in a deeply hidden, lushly vegetated lagoon.

Moremi Gorge is of great religious and spiritual importance to the local community and designated National Monument by the Department of National Museums and Monuments. The surrounding area is co-managed by the Moremi-Mannonye Conservation Trust and Botswana Tourism Organisation. This project involves local residents in the development of non-consumptive eco-tourism activities.

Before venturing into the hills, you should request permission from the local headman as a matter of courtesy. A National Museum guide is available at Moremi village.
